MOTION COMPENSATED CONVERTER **MCC-4K**

HOME CONVERT ENHANCE GENLOCK SYSTEM

The MCC-4K is a universal standards converter providing exceptional quality frame rate and format conversion for UHD/3G/HD signals. MCC-4K offers support for quad link 3G-SDI of two-Sample Interleaved (2SI) or Square Division (SQD) format as well as single link 12G/6G-SDI and SFP connectivity.

UHD conversions

Motion compensated conversion from any UHD frame rate to any other UHD frame rate (4K ↔ 4K), with simultaneous UHD single link 12G/6G and UHD quad link 3G-SDI output, plus automatic detection of SMPTE ST425-5 (sample interleave input) and ITU-R BT.2020 colorimetry.

HD conversions

Motion compensated conversion from any 3G/HD-SDI frame rate to any other 3G/HD-SDI frame rate, as well as up-conversion from 3G/HD to UHD and down-conversion UHD to 3G/HD.

Applications

Live UHD frame rate conversion

MCC-4K is ideal for live frame rate conversion applications, where UHD content sourced at a chosen production frame rate needs to be converted to other frame rates for international contribution and distribution. International sports, concerts, breaking news and current affairs can all be simply and impeccably converted to the desired output format and frame rate.

HD/3G to UHD up-conversion

MCC-4K is perfect for integrating HD and 3G content into UHD programming. Benefiting from proprietary aperture control for up-conversion with enhancement features, MCC-4K transforms 3G/HD content into superb UHD output, offering simultaneous 4K single link 12G/6G and 4K quad link (2SI and SQD).

UHD to HD/3G down-conversion

Simultaneous transmissions in UHD and HD are easy with MCC-4K. Simply configure UHD as input and choose the required HD standard output. ITU-R BT.2020 to ITU-R BT.709 conversion is available if required, as well as process amplifier and RGB color corrector.

HD to HD frame rate conversion

MCC-4K also operates as an 3G/HD motion compensated standards converter, allowing its rapid redeployment for all conversion applications. Availability of loop-through reference input with genlock phase control, and timecode conversions make the MCC-4K ideal for demanding live production environments.

Workflow support

With both 12G/6G-SDI and SFP connectivity, as well as quad link 3G-SDI, MCC-4K can be used in a wide range of production and transmission environments, integrating simply into your workflow.

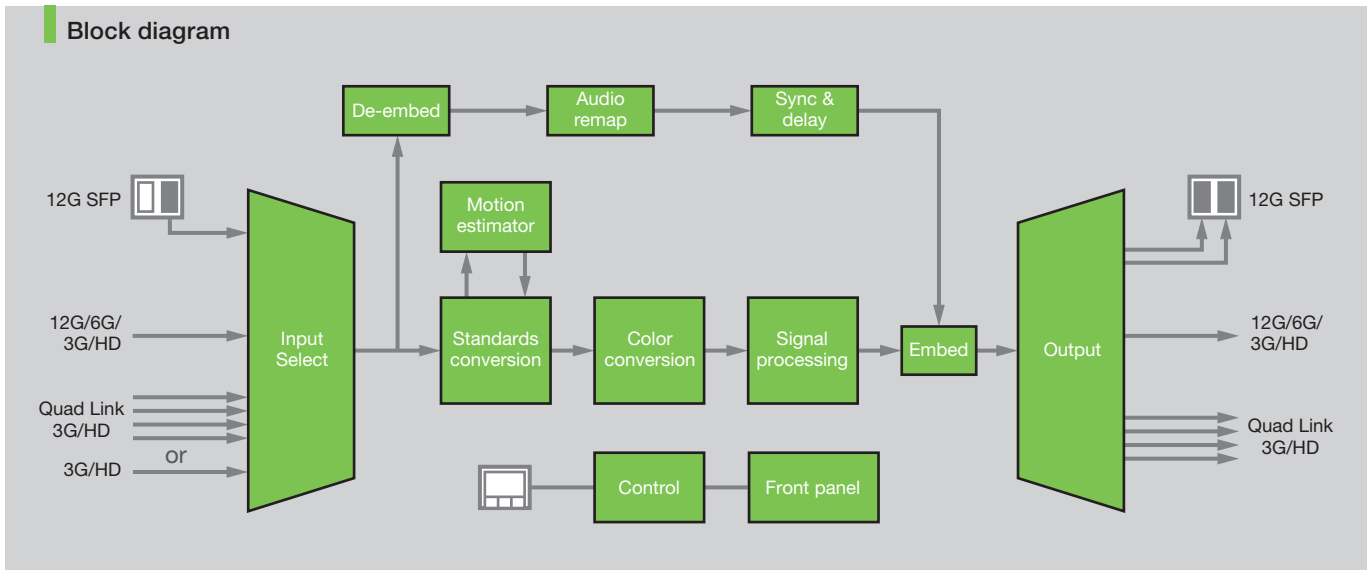

MCC-4K supports 16 channels of embedded PCM audio with a delay matched to the video delay, and straightforward tools enable audio channel remapping, synchronization and delay.

Control is available via an intuitive front panel, with video screen for confidence monitoring, with individual quadrants for square division output. Remote control is also offered via a clearly laid-out browser interface.
