

The pay-per-use solution for standards conversion

Have you discovered that some content is in the wrong frame rate for your project?

Do you have a standards conversion solution but don't have a cost effective way to handle peak demand?

Do you have some great content but your client asks for it in another frame rate for a new region?

If this sounds familiar FrameFormer is the right fit for you. With FrameFormer's motion compensated standards conversion, you can now be sure of our exceptional quality results on-demand, as and when you need it with our SaaS offerings.

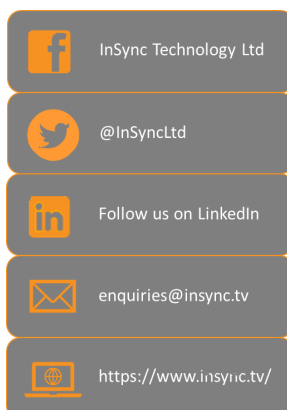

It's easy to use FrameFormer pay as you go. Simply route your file to any of the available cloud based solutions and you're done. You are in control. You only pay for what you use, no contract, no commitment.

Scale up for a project then scale down for the next week or two, you'll always reduce costs and time associated with managing your own on-premise converters when using FrameFormer.

Start saving time and money by using FrameFormer on the cloud from any of our partners: AWS Elemental Mediaconvert, Dalet Amberfin Cloud Transcoder Service and Hiscale FLICS.

Stay updated by following us on social media and by visiting our web site as we integrate FrameFormer into other cloud service providers in future amongst other exciting updates.
